

Support elements, locating elements, stop elements

Self-aligning pads

**Material:**

Body carbon steel.

Ball, ball bearing steel 1.2067.

Form D: Ball with POM insert.

Form H: Ball with POM insert.

Form K: Ball with carbide insert.

Form M has a carbide ball.

Version:

Body tempered and phosphated.

Ball hardened.

Form M ball nickel plated.

Sample order:

K0282.120

Note:

Self-aligning pads serve as stops, supports and thrust pads in fixture constructions.

Ball secured against rotation.

* Valid only if the minimum bore depth is observed.

Drawing reference:

Self-aligning pads

swivel angle 12°

Material:

Body carbon steel.

Ball, ball-bearing steel 1.3505.

Version:

Body tempered.

Ball hardened (50 - 55 HRC).

Sample order:

K0302.106

Note:

Self-aligning pads serve as stops, supports and thrust pads in fixture construction. They can also be installed in existing clamping devices, e.g. arness clamps.

Ball is secured against rotation.

Drawing reference:

Form C: male thread, smooth flattened ball

Form F: male thread, serrated flattened ball

K0283.1061
K0283.1101
K0283.1161

K0283.9061
K0283.9101
K0283.9161

Material:
Body steel.
Ball rust and acid resistant steel.
Form M with carbide insert.

Version:
Body black oxidised.
Ball bright.

Sample order:
K0283.108

Note:
Self-aligning pads are used to support and clamp unmachined and machined workpieces. They also serve as stops, supports and thrust pads in fixture and toolmaking.
Grub screws or threaded studs can be screwed and glued into thread D3 making a self-aligning pad with external thread.

Ball secured against rotation.

Advantages:
- Self-aligning pads can be swiveled.
- High load forces can be absorbed.
- The built-in o-ring keeps dirt and foreign particles out, which in turn guarantees reliable operation.

Self-aligning pads

with o-ring

Material:

Body carbon steel.

Ball:

Form C, F tool steel.

Form K POM.

Form O stainless steel diamond impregnated.

Form P stainless steel with polyurethane face.

Version:

Body tempered, black oxidised.

Ball:

Form C, F hardened, black oxidised.

Form K POM ball, white.

Form O surface comparable to 100 grade abrasive grit.

Form P polyurethane, hardness 60 Shore.

Sample order:

K0284.704X012

Note:

Self-aligning pads are used to support and clamp unmachined and machined workpieces.

They also serve as stops, supports and thrust pads in fixtures and toolmaking.

Ball secured against rotation.

Form O: The abrasive diamond surface is fused firmly to the ball. It is ideally suited to supporting smooth or slippery applications with a minimum of clamping pressure. This allows the diamond particles to get a firm grip on a very small area with minimum damage to the surface. The diamond surface offers excellent wear resistance.

Form P: The polyurethane surface is permanently vulcanised on the ball. It is abrasion-resistant and does not discolour. Offers optimum protection against damage to delicate surfaces. The pearl-like surface gives a firm grip and allows air to escape so as to prevent any suction effect between the contact surface and the self-aligning pads.

Advantages:

The built-in O-ring holds the ball in place and keeps dirt and foreign particles out ensuring smooth and even movement.

Self-aligning pads

with o-ring and exchangeable inserts

Material:

Body carbon steel.

Ball rust and acid resistant steel.

Inserts:

Form C, F, M tool steel

Form K POM

Form E stainless steel.

Form O stainless steel diamond impregnated.

Form P stainless steel with polyurethane surface.

Version:

Body tempered, black oxidised.

Ball hardened, bright.

Inserts:

Form C, F hardened, black oxidised.

Form M with carbide serrations, black oxidised.

Form K white.

Form E hardened, bright.

Form O diamond impregnated surface comparable to 100 grade abrasive grit.

Form P polyurethane surface, hardness 60 Shore.

Sample order:

K0285.736X036

Note:

Self-aligning pads are used to support and clamp unmachined and machined workpieces.

In addition, they serve as stops, supports and thrust pads in fixtures and toolmaking.

The ball can be removed from the housing by applying light pressure to the socket head screw.

Ball secured against rotation.

Advantages:

Highly cost-effective as inserts can be exchanged.

The built-in O-ring holds the ball in place and keeps dirt and foreign particles out, ensuring uniform movement.

Self-aligning pads

self-righting

Material:

Carbon steel.

Version:

Hardened, black oxidised.

Sample order:

K0286.105

Note:

Self-aligning pads are used to support and clamp unmachined and machined workpieces. They also serve as stops, supports and thrust pads in fixtures and toolmaking.

Advantages:

- The built-in O-ring prevents dirt and foreign particles from entering.
- The clamping surface swivels back automatically after clamping.
- High load rating and small size.

Drawing reference:

Form C: smooth face

Form F: serrated face

Self-aligning pads

self-righting

Material:

Form C and F:
Ball steel, ball seat high-carbon steel.

Form G and J:
Ball high-carbon steel, ball seat steel.

Version:

Form C and F:
Ball hardened and black oxidised, ball seat phosphated.

Form G and J:
Ball phosphated, ball seat hardened and black oxidised.

Sample order:

K1164.106

Note:

The self-aligning pads serve as stops, rests and thrust pads in fixture construction.

The seating face returns to the start position when the load is removed.

Ball secured against rotation.

Drawing reference:

Form C: male thread, flattened ball, smooth

Form F: male thread, flattened ball, diamond grip

Form G: press fit, flattened ball, smooth

Form J: press fit, flattened ball, diamond grip

Self-aligning pads

male thread, with O-ring

Material:

Body carbon steel.

Ball:

Form C, F, tool steel.

Form K POM.

Form O stainless steel diamond impregnated.

Form P stainless steel with polyurethane surface.

Version:

Body tempered, black oxidised.

Ball:

Form C, F hardened, black oxidised.

Form K POM ball white.

Form O surface comparable to 100 grade abrasive grit.

Form P polyurethane hardness 60 Shore.

Sample order:

K0288.506X012

(include length L1)

Note:

Self-aligning pads are used to support and clamp unmachined and machined workpieces.

They also serve as stops, supports and thrust pads in fixtures and toolmaking.

Ball secured against rotation.

Form O: The abrasive diamond surface is bonded firmly to the ball. It is ideally suited to supporting smooth or slippery applications with a minimum of clamping pressure. This allows the diamond particles to get a firm grip on a very small area with minimum damage to the surface.

The diamond surface offers excellent wear resistance.

Form P: The polyurethane surface is vulcanised firmly to the ball. It is abrasion-resistant and does not discolour.

It offers optimum protection against damage to delicate surfaces. The pearl-like surface gives a firm grip and allows air to escape so as to prevent any suction effect between the contact surface and the self-aligning pads.

Advantages:

The built-in O-ring holds the ball in place and keeps dirt and foreign particles out, ensuring uniform movement.

Self-aligning pads

male thread, with O-ring

Self-aligning pads

adjustable, with O-ring and exchangeable inserts

Material:

Body carbon steel.

Ball rust and acid resistant steel.

Inserts:

Form C, F, M tool steel

Form K POM

Form E stainless steel.

Form O stainless steel diamond impregnated.

Form P stainless steel with polyurethane surface.

Version:

Body tempered, black oxidised.

Ball hardened, bright.

Inserts:

Form C, F hardened, black oxidised.

Form M with carbide serrations, black oxidised.

Form K white.

Form E hardened, bright.

Form O diamond impregnated surface comparable to 100 grade abrasive grit.

Form P polyurethane surface, hardness 60 Shore.

Sample order:

K0289.124X100

Note:

Self-aligning pads are used to support and clamp unmachined and machined workpieces.

They also serve as stops, supports and thrust pads in fixtures and toolmaking.

The ball can be removed from the housing by applying light pressure to the socket head screw.

Ball secured against rotation.

Advantages:

Highly cost-effective as inserts can be exchanged.

The built-in O-ring holds the ball in place and keeps dirt and foreign particles out, ensuring uniform movement.

Self-aligning pads

adjustable, with O-ring and exchangeable inserts

Self-aligning pads

adjustable, with O-ring and hexagon socket

Material:

Body carbon steel.

Ball:

Form C, F, tool steel.

Form K POM.

Form O stainless steel diamond impregnated.

Form P stainless steel with polyurethane surface.

Version:

Body tempered, black oxidised.

Ball:

Form C, F hardened, black oxidised.

Form K POM ball white.

Form O surface comparable to 100 grade abrasive grit.

Form P polyurethane, hardness 60 Shore.

Sample order:

K0290.510X026

(include length L)

Note:

Self-aligning pads are used to support and clamp unmachined and machined workpieces.

They also serve as stops, supports and thrust pads in fixtures and toolmaking.

Ball secured against rotation.

Form O: The abrasive diamond surface is bonded firmly to the ball. It is ideally suited to supporting smooth or slippery applications with a minimum of clamping pressure. This allows the diamond particles to get a firm grip on a very small area with minimum damage to the surface.

The diamond surface offers excellent wear resistance.

Form P: The polyurethane surface is vulcanised firmly to the ball. It is abrasion-resistant and does not discolour. Offers optimum protection against damage to delicate surfaces. The pearl-like surface gives a firm grip and allows air to escape so as to prevent any suction effect between the contact surface and the toggle locator.

Advantages:

The built-in O-ring holds the ball in place and keeps dirt and foreign particles out, ensuring uniform movement.

The hexagon socket allows easy adjustment and positioning in through holes.

Self-aligning pads

adjustable, with O-ring and hexagon socket

Self-aligning pads

adjustable, with O-ring, exchangeable inserts and hexagon socket

Material:

Body carbon steel.
Ball rust and acid resistant steel.
Inserts:
Form C, F, M tool steel
Form K POM
Form E stainless steel.
Form O stainless steel diamond impregnated.
Form P stainless steel with polyurethane surface.

Version:

Body tempered, black oxidised.
Ball hardened, bright.
Inserts:
Form C, F hardened, black oxidised.
Form M with carbide serrations, black oxidised.
Form K white.
Form E hardened, bright.
Form O diamond impregnated surface comparable to 100 grade abrasive grit.
Form P polyurethane surface, hardness 60 Shore.

Sample order:

K0291.720X070

Note:

Self-aligning pads are used to support and clamp unmachined and machined workpieces.
They also serve as stops, supports and thrust pads in fixtures and toolmaking.
The ball can be removed from the housing by applying light pressure to the socket head screw.

Ball secured against rotation.

Advantages:

Highly cost-effective as inserts can be exchanged.
The built-in O-ring holds the ball in place and keeps dirt and foreign particles out, ensuring uniform movement.

Ball-end thrust screws with head

Material:
Screw carbon steel.
Ball ball-bearing steel.

Version:
Screw grade min. 10.9, black.
Ball hardened, bright.

Sample order:
K0380.10820

Drawing reference:

Form A: full ball
Form B: flattened ball
Form BV: flattened ball non-rotating
Form F: flattened ball diamond grip
Form FV: flattened ball diamond grip non-rotating

Note:

Form A with full ball is used when a clean, polished contact surface is required. Surfaces which are not flat and parallel can be firmly clamped or supported with Form B with flattened ball, the movable ball can adapt itself up to 9°.

Ball-end thrust screws with head

stainless steel

Material:
Stainless steel

Version:
Bright.

Sample order:
K0381.11230

Note:
Form A with full ball is used when a clean, polished contact surface is required. Surfaces which are not flat and parallel can be firmly clamped or supported with Form B with flattened ball, the movable ball can adapt itself up to 9°.

Drawing reference:
Form A: with full ball
Form B: with flattened ball

Ball-end thrust screws without head

with fine thread

Material:

Screw carbon steel, grade 10.9
Ball, ball-bearing steel.

Version:

Screw black.
Ball hardened and bright.

Sample order:

K0382.11025

Note:

Form A with full ball is used when a clean, polished pressure surface is required. Surfaces which are not plane and parallel can be firmly clamped or supported with Form B with flattened ball because the movable ball can adapt itself up to 9°.

Fine thread enables extremely sensitive alignment of the ball-end thrust screws.

Drawing reference:

Form A: with full ball
Form B: with flattened ball

Ball-end thrust screws without head

with full ball

Material:

Screw carbon steel, grade 10.9
Ball, ball-bearing steel or POM.

Version:

Screw black.
Ball hardened bright or POM.

Sample order:

K0383.10810

Note:

Ball-end thrust screws with full ball are used when a clean, polished contact surface is required.
Longer versions have been specially designed to be glued in, allowing mechanical connecting elements with external thread to be made cost-effectively for small and medium-sized series.

Drawing reference:

Ball-end thrust screws without head

stainless steel with full ball

Material:

Screw stainless steel.

Ball stainless steel, POM or ceramic Si_3N_4 .

Version:

Stainless steel bright.

Sample order:

K0384.1046

Note:

Ball-end thrust screws with full ball are used when a clean, polished contact surface is required. Longer versions have been designed especially to be glued in, allowing mechanical connecting elements with external threads to be made cost-effectively for small and medium-sized runs. Silicon nitride (Si_3N_4) is characterised by a combination of excellent properties, these include high resilience and strength, excellent wear resistance and good chemical resistance.

Drawing reference:

Ball-end thrust screws without head

with flattened ball

Material:

Screw carbon steel, grade 10.9
Ball, ball-bearing steel or POM.

Version:

Screw black.
Ball hardened bright or POM.

Sample order:

K0383.41012

Note:

Surfaces which are not flat and parallel can be firmly clamped or supported with Form B, C or F with flattened ball, the movable ball can adapt itself up to 9°.

Longer versions have been specially designed to glue in, allowing mechanical connecting elements with external thread to be made cost-effectively for small and medium-sized series.

Drawing reference:

Form B: steel ball
Form C: POM ball
Form F: steel ball diamond grip

Material:

Screw and ball stainless steel.

Version:

Stainless steel bright.

Sample order:

K0384.2046

Note:

Surfaces which are not flat and parallel can be firmly clamped or supported with a flattened ball, the movable ball can adapt itself up to 9°. Longer versions have been designed especially to be glued in. This allows mechanical connecting elements with external thread to be made cost-effectively for small and medium-sized series.

Ball-end thrust screws without head

with flattened ball and rotation lock

Material:

Screw carbon steel, grade 10.9
Ball, ball-bearing steel.

Version:

Screw black. Ball hardened, bright.

Sample order:

K0383.50820

Note:

Surfaces which are not flat and parallel can be firmly clamped or supported with with a flattened ball, the movable ball can adapt itself up to 9°. Longer versions have been designed especially to be glued in. This allows mechanical connecting elements with external thread to be made cost-effectively for small and medium-sized series.

Ball-end thrust screws without head

with flattened ball LONG-LOK secured

Material:

Screw carbon steel, grade 10.9
Ball, ball-bearing steel.
LONG-LOK thread lock nylon.

Version:

Screw black. Ball hardened, bright.

Sample order:

K0666.20610

Note:

Surfaces which are not flat and parallel can be firmly clamped or supported with a flattened ball, the movable ball can adapt itself up to 9°.

Drawing reference:

Form B: with flattened ball

L4 = approx. 2x pitch

Thrust screws with rounded half-dog point

**Material:**

Screw steel grade 10.9.

Pin tool steel.

Version:

Pin, hardened.

Screw and pin black oxidised.

Sample order:

K0403.05X09

Note:

These rounded half-dog point thrust screws are used when a punctiform thrust or support point are required.

A large rectangular area filled with a light gray grid pattern, intended for taking notes.

Grippers and inserts

round

Form C, E, K

* Applies to Form K

Form O
stainless steel insert
diamond impregnated

Form P
stainless steel insert,
PUR surface

Form F
diamond grip insert

Form M
carbide steel
diamond grip insert

Material:

Form C, F, M tool steel

Form E, O, P stainless steel

Form K POM

Version:

Form C hardened and black oxidised.

Form E hardened, bright.

Form K white.

Form O with diamond impregnated surface comparable to 100 grade abrasive grit.

Form P with polyurethane surface, hardness 60 Shore.

Form F, hardened and black oxidised.

Form M with carbide serrations, black oxidised.

Sample order:

K0385.2510

Note:

Grippers and inserts are ideal for use in clamping arms, gripping systems, clamping fixtures, clamping jaws and self-aligning pads. The use of grippers allows the transfer of very high torque values and above average grip, even with hard materials and surface irregularities.

Form O: The abrasive diamond surface is bonded firmly to the base. It is ideally suited to supporting smooth or slippery applications with a minimum of clamping pressure. This allows the diamond particles to get a firm grip on a very small area with minimum damage to the surface.

The diamond surface offers excellent wear resistance.

Form P: The polyurethane surface is vulcanised firmly to the ball. It is abrasion-resistant and does not discolour. It offers optimum protection against damage to delicate surfaces. The pearl-like surface gives a firm grip and allows air to escape so as to prevent any suction effect between the contact surface and the self-aligning pads.

Grippers and inserts can be fitted in the following self-aligning pads:

Order No. K0285.117X022 up to K0285.936X036

Gripper pads

square

Material:

Hardened tool steel or carbide.

Version:

Black oxidised.

Sample order:

K0387.2506

Note:

Grippers and inserts are ideal for use in clamping arms, gripping systems, clamping fixtures, clamping jaws and self-aligning pads.

Grippers transfer very high torque values, even with hard materials and surface irregularities. Grippers guarantee above average holding forces at high cutting forces.

The serrated carbide tips are soldered in.

Gripper studs

Material:
Hardened tool steel or carbide.

Version:
Black oxidised.

Sample order:
K0388.5012

Note:
The full thread on the grippers allows exact adjustment to the clamping application.
The carbide tips are soldered in.

Drawing reference:
Form A: tool steel
Form B: tool steel, carbide diamond grip
Form C: 4-point carbide insert

Locating pins expanding

Material:

Carbon steel.

Version:

Tempered and black oxidised.
Locating diameter and guide faces ground.

Sample order:

K0356.1610

Note:

These expanding locating pins enable e.g. tooling plates to be positioned in the T-slots of machine tables (see illustration).

The plates to be positioned must have two holes matching the expanding pin diameter.

The expansion screw has a broached through hexagonal hole allowing the pin to be tightened or loosened from two sides.

Drawing reference:

- 1) tooling plate
- 2) clamp straps
- 3) machine table
- 4) expanding locating pin

Locating pins and rest pads

DIN 6321 (Issue 1973)

**Material:**

Tool steel.

Version:

Hardened and ground.

Sample order:

K0293.212

Note:

Rest pads Form A are supports for workpieces and fixtures.

Locating pins Form B are for positioning workpieces and fixture components in reamed holes.

The flattened Form C can be used to bridge tolerances in hole spacing or to secure the part to be positioned in one direction only.

Form A and B can also be used as hardened stops and as fixture feet.

For similar pins see K0352, K0353, K0354 and K0355.

Drawing reference:

Form A: Rest pad

Form B: Cylindrical locating pin

Form C: Flattened locating pin

Other dimensions see Form A.

Locating pins

with internal thread

Material:

Steel.

Version:

Hardened and ground (HRC 60 ±2).

Sample order:

K1094.208

Note:

Locating pins are specially designed to ease the locating process. When used in conjunction with the hardened locating bushes K1095, they allow for a rapid, precise and low-wear workpiece exchange.

Drawing reference:

Rest pads

Material:
Body carbon steel.

Version:
Body tempered and black oxidised.

Sample order:
K0294.106012

Note:
Rest pads are for supporting machined and non-machined parts. They can also be used as stops and thrust pads in fixtures and toolmaking. Studs or grub screws can be screwed and glued into the tapped hole D to make a rest pad with external thread.

Drawing reference:

A large rectangular area filled with a light gray grid pattern, intended for taking notes.

Rest pads

pin form, internal thread

Material:

Carbon steel.

Version:

Tempered, black oxidised.

Seating face inductively hardened and ground.

Sample order:

K1105.2060420

Note:

The rest pads can be used both as a stable and precise support and as a stop.

The pin form of the rest pad also allows it to be used with components with constricted support points.

Stop

adjustable, with end position feedback

Material:

Screw and plunger stainless steel 1.4301
Guide bush stainless steel 1.4112
Sensor housing stainless steel.

Version:

Screw and plunger, bright.
Guide bushing, bright.
Sensor housing, bright.
Inductive sensor:
Relay (NO)
Operating voltage 10 - 30 V DC
Operating current 100 mA
Switching distance 0.8 mm
Protection class: IP 67
Connection type: 0.3 m PUR cable with connector plug
Temperature range: -25°C - +70°C
Approval: CE, c-UL-us

Sample order:

K0581.080352

Note:

The ensured sensing distance is achieved if the plunger is actuated flush up to the stop surface of the guide bush. The sensor is supplied unassembled.

Installation recommendation: glue in with Loctite 638.

Caution: screw sensor in until it comes to a stop.

Safety:

End position feedback stops are not suitable for personal protection.

Drawing reference:

KIPP Clamp stops adjustable for slot profiles

Order No.	D	D1	D2	H	H1	L
K1214.064040	40	M6	32	60	40	7

Spherical washers

DIN 6319, edition 10/01

Material:

Mild steel or stainless steel.

Form G carbon steel tempered to HV 390 ±40.

Version:

Steel version case hardened.

Stainless steel version bright, not hardened.

Sample order:

K0729.216

Note:

Conical seat Form G should be used over slots.

Drawing reference:

Form C: spherical washer

Form D: conical seat $D4 = D3$

Form G: conical seat $D4 > D3$

Spherical levelling washers

Material:

Steel 1.7225.
Stainless steel 1.4305.

Version:

Steel blue passivated.
Stainless steel, bright.

Sample order:

K0691.401

Note:

Spherical levelling washers are for exact positioning when mounting up to 4° sloping surfaces. A second spherical levelling washer is recommended as support to correct the bolt angle if the angle of D3 is > 1°. The two washers cannot be detached from each other.

KIPP Spherical levelling washers

A large rectangular area filled with a fine grid pattern, intended for taking notes or drawing.

Levelling sets

high version

Material:

Steel 1.7225.

Stainless steel 1.4305.

Version:

Standard version zinc galvanised and blue passivated.
Stainless steel version bright.

Sample order:

K0692.01505

Note:

Levelling sets are used for mounting, levelling and aligning motors, aggregates, drive units and assembly lines. They have a large adjustment range of 15 mm to 40 mm. Other sizes available on request.

Levelling sets

low version

Material:

Steel 1.7225.

Stainless steel 1.4305.

Version:

Standard version zinc galvanised and blue passivated.
Stainless steel version bright.

Sample order:

K0694.0404

Note:

Levelling sets are used for mounting, levelling and aligning motors, aggregates, drive units and assembly lines. This levelling set has an extremely low height. Single levelling sets can be set at several mounting points to achieve a precise and torsion-free alignment.

Levelling sets

spherical washer

Material:

Steel 1.7225.

Stainless steel 1.4305.

Version:

Standard version zinc galvanised and blue passivated.

Stainless steel version bright.

Sample order:

K0695.0406

Note:

Levelling sets with spherical washers are used for mounting, levelling and aligning motors, aggregates, drive units and assembly lines. The spherical washer permits exact alignment when mounting sloping surfaces of up to 4°.

Levelling sets

with locknut

Material:

Steel 1.7225.

Stainless steel 1.4305.

Version:

Standard version zinc galvanised and blue passivated.
Stainless steel version bright.

Sample order:

K0097.0404

Note:

These low version levelling sets with locknut are used to mount and align motors, aggregates, drive units and production lines. The advantage is the low height. Alignments can be made quickly and easily even with several levelling points. Distortion-free mounting is guaranteed. The locknut secures a prescribed adjustment.

Levelling sets

spherical washer with locknut

Material:

Steel 1.7225.

Stainless steel 1.4305.

Version:

Standard version zinc galvanised and blue passivated.
Stainless steel version bright.

Sample order:

K0115.0406

Note:

The spherical washer levelling set is used to mount and align motors, aggregates, drive units and production lines. The spherical washer gives exact alignment of sloping faces with an inclination of up to 4°. The locknut secures a prescribed adjustment.
