## ALPHATEC NITRILE GLOVES® 58-535W

### ITEM: K2420

Gloves with nitrile coating, antistatic EN 1149. The Alphatec gloves allow the user to handle wet or oiled objects with less gripping force and greater control, a unique combination of impermeability to chemicals and grip, combined with flexibility and dexterity that makes the AlphaTec glove the only choice in the presence of chemicals. Solid nitrile construction for high protection against exposure to bases, oils, fuels, some solvents and greases. The 58-535W with white nylon lining are recommended for indoor applications. Green and anthracite colour.
