

HOSE CLAMPS STAINLESS STEEL W4 AISI 304 DIN 3017

ITEM: F8827

Stainless steel hose clamps standard DIN 3017 They are made with a perforated band and rounded edges to avoid damaging the tubes. Mechanical seam of the tape to guarantee an effective seal. The tie has an high flexibility in the adaptment of the circumference of the tube and it is suitable for all industrial applications.

Material: Stainless steel hose clamps AISI 304 - Screws and band in carbon zinc steel AISI 304

Tech. Code		Min - max clamping mm	Belt mm	Screw T.E. mm	
F8827008		8 - 12	9	7	100
F8827010		10 - 16			
F8827012		12 - 22			
F8827016		16 - 27			
F8827020		20 - 32			
F8827025		25 - 40			
F8827030		30 - 45			
F8827032		32 - 50			
F8827040		40 - 60			

NOTE: Price shown refers to a 100-piece lot

Tech. Code		Min - max clamping mm	Belt mm	Screw T.E. mm	
F8827050		50 - 70	9	7	50
F8827060		60 - 80			
F8827070		70 - 90			
F8827080		80 - 100			
F8827090		90 - 110			
F8827100		100 - 120			
F8827110		110 - 130			
F8827120		120 - 140			

ITEM: F8828

Stainless steel hose clamps standard DIN 3017 They are made with a perforated band and rounded edges to avoid damaging the tubes. Mechanical seam of the tape to guarantee an effective seal. The tie has an high flexibility in the adaptment of the circumference of the tube and it is suitable for all industrial applications.
