## L40 – MULTIFUNCTION AUTOMATED MACHINE FOR DISTRIBUTION OF LARGE-SIZE PRODUCTS

The self-service L40 machine is designed for **automatic distribution of up to 40 different products**. A **simple, square construction** enables you to load **large-sized products**. Specially designed openings in the back of the shelves allow for **internal 230V installations** to supply power to the stored products. **Intuitive management** is provided through a display with 15 touch sensitive buttons. You can connect a **bar code reader** to the machine.

**L40 automated machine successfully functions as an ancillary unit of D540 and D1080 automated machine.**

 <p>Dimensions in mm</p>	A	B	C
	80	400	586
	170	400	586
	260	400	586
	350	400	586

### Shelf adjustment function

Through the shelf adjustment function – **adjustment of height, in 4 sizes**, the machine can be loaded with up to 40 products at the same time. Easy arrangement of shelves enables clients to **adjust the capacity of the machine** to meet the current needs **whenever necessary**.
